XII. FIREPLACE CLEANING AND INSPECTIONS

- A. One of the major causes of home fires is fireplaces and chimneys. The risk associated with using a fireplace can be greatly reduced by having regular inspections to determine whether they are safe or require cleaning or repair. In order to promote the safety of all Co-owners and residents the Board of Directors has adopted the following policy.
- B. All fireplaces, chimney flues and any components attached thereto must be inspected using a Level One inspection as defined by the National Fire Prevention Association (NFPA) by a qualified inspector who is certified by the Chimney Safety Institute of America (CSIA) at least every three years beginning in 2017.
 1. This requirement applies to all fireplaces including wood burning, gas burning, pellet burning or any other type of fireplace regardless of the ignition source or whether the fireplace is in use.
 2. All inspections, repairs and or replacement must be completed by September 30 of each inspection year.
- C. If the inspection determines that the fireplace, flue or any components attached need to be cleaned, repaired, or replaced or requires a higher level of inspection, it must be done within 30 days from the date of the inspection.
- D. Costs for all inspections, cleaning, repairs and replacements are the Co-owners' responsibility.
- E. Co-owners must provide the Association with a paid receipt and an inspection report specifying the services provided and any recommendations from the inspector.
- F. If cleaning, repair or replacement is not required, the inspection report must so state.
- G. The Association will maintain a list of contractors who are certified to perform this type of work. Please contact the office.
- H. Co-owners may use their own contractors if certified as noted above to perform this type of work.

1. This policy and the following rules are intended to give Co-owners and residents a general guideline on how and when the snow is removed and what is expected from the Co-owners and residents in order for the Association to quickly and efficiently remove snow from the walkways, porches, parking lots and roadways.
2. Snow removal is conducted by the Association's maintenance staff. Each snowfall may be different due to the type, amount, and time of the snowfall.
